

Multi-Room Audio

The home of today is typically open plan, flows from indoor to outdoor and has simple lines with little clutter. Multi room audio allows high quality stereo music to be precisely or widely delivered, without ungainly components or big 'boxy' speakers. It's suitable for even the most challenging room. Audio throughout your home offers arguably the biggest immediate impact possible as your friends, family, or potential buyers walk through the front door. This entry offer includes 2 areas of audio to the rooms of your choice, fed from your central audio system and comprises the following:

Key Features

- 2 x pairs of premium quality in-ceiling speakers.
- 2 x in-wall volume controls.
- Full installation and commissioning*.
- Main control unit (power supply).
- Manufacturer's warranty.

What You Require

A central audio system. (Nearly all on the market are compatible.)

Optional Extras Available

- Add as many rooms as you wish.
- Integration to web radio and MP3 file servers (Integra Amplifier Range).
- Add infra red capability. Now you can skip through your CD collection at will from specified areas throughout the home.
- Independence from main system, allowing the kids to watch a DVD while you simultaneously listen to your CD player.
- Keypad style control wall plates.
- Architectural, stainless steel and brushed aluminum wall plates
- Integration with smart wiring.

Demonstrations are available at Intelligent Home's showroom, and select display homes, or please call for more details. Package available from Intelligent Home and selected builders only.
